Open to: Vadodara | Ahmedabad | Gandhinagar | Pune | PAN India

PROFESSIONAL SUMMARY

Senior QA Engineer with 6+ years of experience in manual and automation testing across web and mobile applications, including 3+ years of hands-on Selenium WebDriver (Java) automation. Built a Selenium framework from scratch using TestNG, Page Object Model and a data-driven design with Allure reporting and Jenkins CI/CD, and automated end-to-end REST API suites with REST Assured and Postman, backed by MySQL data validation. Led end-to-end QA for a multi-module fleet management platform and trained and managed a five-member QA team in an Agile/Scrum environment. Earlier experience spans functional, regression, system and UAT testing for a driving licence system, Microsoft Dynamics CRM, e-commerce systems and Android/iOS applications.

TECHNICAL SKILLS

- **Testing:** Manual Testing, Functional Testing, Regression Testing, System Testing, User Acceptance Testing (UAT), End-to-End (E2E) Testing, Smoke Testing, Mobile App Testing, Risk-Based Testing, Security testing (basics), Performance testing using JMeter
- **Test Design & Management:** Test Strategy & Planning, Test Case Design, Test Plan Execution, Defect Management, Release Sign-off, QA Team Management & Mentoring
- **Automation:** Selenium WebDriver, TestNG, Page Object Model (POM), Data-Driven Framework, Hybrid Framework, Allure Reports, Regression Suite Automation, Cross-Browser Testing, Playwright (basic)
- **Programming & Database:** Java, MySQL
- **API Testing:** REST API Testing, REST Assured, Postman
- **Build, CI/CD & Version Control:** Maven, Jenkins (CI/CD), GitHub Desktop, Bitbucket, SourceTree
- **Test & Project Management Tools:** JIRA, TestRail, QATouch, Azure DevOps
- **Methodology:** Agile/Scrum
- **AI Tools:** Claude Code, ChatGPT, Copilot

PROFESSIONAL EXPERIENCE

Senior QA Engineer

Dec 2022 – Sep 2026

Aecor Digital International Pvt. Ltd. | Fleet Management Platform

- Led end-to-end QA for a multi-module fleet management platform.
- Trained and managed a five-member QA team.
- Architected and maintained a Selenium WebDriver (Java) automation framework built from scratch, using TestNG, Page Object Model and a data-driven design with Allure reporting and cross-browser execution, expanding regression coverage and reducing manual testing effort.
- Configured Jenkins jobs to run the automation suites as part of CI/CD.
- Automated end-to-end REST API test suites using REST Assured and Postman.
- Validated backend data in MySQL using SQL queries, including joins, alongside API tests to confirm data integrity.
- Performed regression testing on UAT, deployment validation, and smoke testing on production; also tested the platform's mobile app.
- Used AI tools (Claude Code, ChatGPT, Copilot) to generate test cases and automation scripts.
- Managed the defect lifecycle in JIRA (logging, triage, root cause analysis and resolution tracking) and used QATouch for test management.
- Participated in Agile/Scrum ceremonies (sprint planning, backlog grooming, stand-ups) to clarify requirements and surface risks early.

QA Engineer

Aug 2022 – Dec 2022

Celtic Systems Pvt. Ltd. | Driving Licence System

- Executed functional, regression, system and user acceptance testing for a Driving Licence System.
- Verified licence issuance, renewal, suspension and driver-record modules against the applicable regulatory requirements.
- Designed detailed test cases and dedicated test data sets to close coverage gaps across end-to-end workflows.
- Owned the defect lifecycle in JIRA, working with cross-functional teams.

QA Engineer

May 2022 – Aug 2022

Vedlogic Solutions Pvt. Ltd. | Microsoft Dynamics CRM and Mobile Booking App

- Validated Microsoft Dynamics CRM workflows for insurance, lead management and process automation.
- Designed functional, regression and system test cases to improve feature reliability and workflow stability.
- Tested an iOS/Android Eyebrow Salon Booking app, supporting booking-flow reliability through structured defect tracking and UAT support.

QA Engineer

Jun 2020 – Apr 2022

YAKS Group | MLM Platforms, E-commerce and Mobile Apps

- Worked in a three-member QA team on multi-level marketing (MLM) platforms, e-commerce systems and Android/iOS applications, covering test planning, execution and release sign-off.
- Trained and mentored two fresher QA engineers who joined the team.
- Contributed to standardizing risk-based testing and release processes across projects to reduce recurring post-release defects.
- Worked with sales, product and engineering teams to clarify requirements, prioritize defects and unblock releases.

EDUCATION

- B.E. in Computer Engineering | Sigma Institute of Engineering, Vadodara | 2019 | 7.52 CGPA

ACHIEVEMENTS

- QA of the Year | Aecor Digital International Pvt. Ltd. | 2023
- Emerging Performer of the Year | YAKS Group | 2020

CERTIFICATIONS & TRAINING

- Udemy: Selenium WebDriver with Java
- Udemy: Learn Bug Bounty Hunting & Web Security Testing
